Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

- The title has been amended as follows: after "Medium", the following phrase/word was inserted: "Including a Diamond-like Carbon Protective Film With Hydrogen and at Least Two Additional Elements".

Reasons for Allowance

2. The present claims are deemed allowable over the references of record since the references of record are commonly assigned and a terminal disclaimer has been filed to obviate the obviousness-type double patenting rejections.

3. The present claims are deemed allowable over the references Schmidt et al. (U.S. Patent No. 5,266,409) and Arai et al. (U.S. Patent No. 5,198,285) since neither reference discloses a protective layer meeting the claimed material limitations.

While Schmidt et al. teach a carbon-based protective layer further including hydrogen, silicon and boron, Schmidt et al. teach that in order for the film to possess diamond-like carbon, the hydrogen content must be 4.8 at% or less, hence outside of the claimed hydrogen content range (*Abstract and columns 5 – 6*). Therefore, Schmidt et al., alone or in view of the prior art of record, fails to teach or render obvious the claimed composition of the protective layer.

While Arai et al. teach a diamond-like carbon protective layer further including hydrogen and silicon within applicants' claimed atomic percent limitations, as well as an intermediate layer between a Fe-based layer and the DLC-Si-H layer which can contain nitrogen, Arai et al. fail to teach or render obvious further including a Group III or V element in the DLC-Si-H protective layer. The Examiner notes that nitrogen is a Group V element and Arai et al. specifically mentions that the nitrogen is only optionally added to the *iron-carbon based intermediate layer*, not the DLC-Si-H protective layer.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
